Important safety information (1)

Do not use Zentel if you are pregnant. Women of childbearing age should only use Zentel during the first 10 days of starting their period, or immediately after a negative pregnancy test.

Important safety information (2)

Some people, particularly young children, may experience **problems swallowing Zentel tablets whole.**

To avoid any problems, the **tablets can be broken, crushed or chewed with a little water.** Alternatively, Zentel suspension can be used.

Important safety information (3)

If you have been **diagnosed with liver problems** please consult a doctor before taking Zentel.

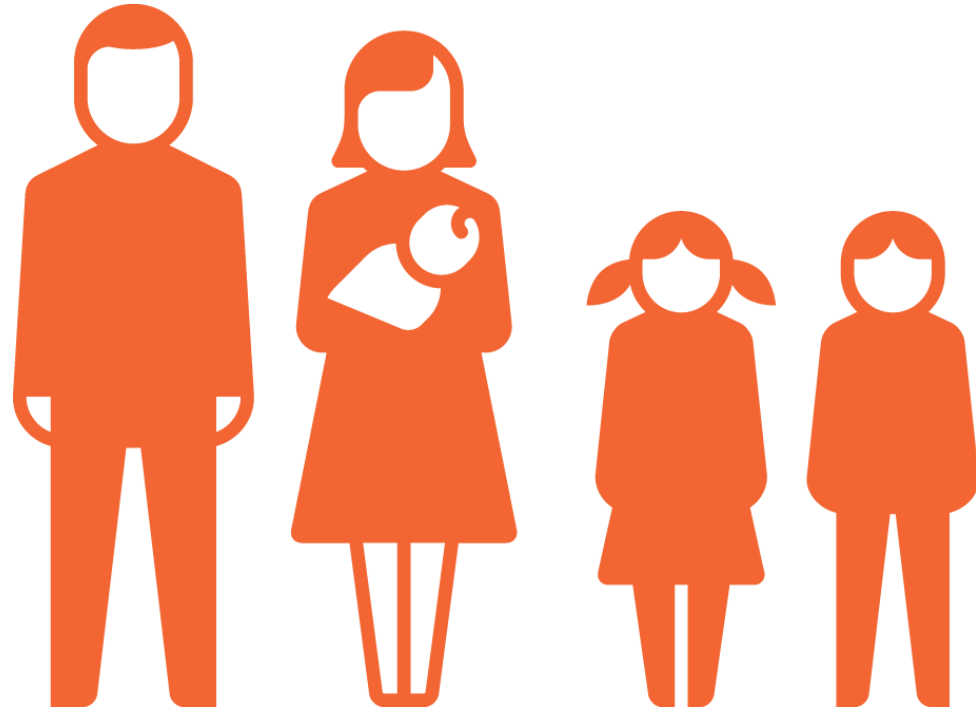

Please also consult a doctor if you experience **yellowing of the skin or eyes** after taking Zentel.

Important safety information (4)

Please consult a doctor as soon as possible if you develop **severe headaches with nausea and vomiting, fits and problems with your vision** after taking Zentel.

Be healthy!
